

TALHA AHMAD

Aspiring ML / AI Engineer & Data Scientist

Kohat, KPK, Pakistan | talhakhan111221@gmail.com | +92 330-5631702

[GitHub](#) | [Kaggle](#) | [LinkedIn](#) | [LeetCode](#)

SUMMARY

Software Engineering undergraduate building hands-on machine learning and data science skills through a self-directed, structured learning program. Comfortable with the Python data-science stack, exploratory data analysis, feature engineering, and building ML pipelines with scikit-learn. Actively maintains a public GitHub portfolio and practices data manipulation and SQL through Kaggle and LeetCode.

EDUCATION

BS Software Engineering — Kohat University of Science and Technology, Kohat

CGPA: 3.76 (through 4 semesters)

Intermediate, Computer Science — Iqra Public School and Boys College, Kohat

Matriculation, Computer Science — Fauji Foundation School and College, Lachi, Kohat

PROJECTS

Book Data Web Scraper & Dataset — [books.toscrape.com](#)

- Built an end-to-end web scraper in Python using Requests and BeautifulSoup to collect ~781 book records across all site categories, including title, price, star rating, and stock status.
- Engineered a synthetic "out of stock" label with NumPy to extend the dataset for supervised learning use cases.
- Cleaned, documented, and published the dataset to Kaggle with a README covering data provenance and potential ML applications.

Machine Learning Portfolio (100 Days of ML)

- Working through a structured, self-directed "100 Days of ML" curriculum covering EDA, feature engineering, feature transformation, dimensionality reduction, and model development.
- Built and compared scikit-learn ML pipelines (ColumnTransformer, FunctionTransformer, GridSearchCV) against non-pipeline workflows to evaluate transformer selection and reproducibility.
- Applied Box-Cox/Yeo-Johnson transformations, PCA, and multiple missing-data imputation strategies (KNN, mode, missing-indicator) across practice datasets.

Public Machine Learning Repository

- Maintain a public GitHub repository ([github.com/Professorlegit-66/Machine-Learning](#)) documenting the full ML learning journey with a structured directory tree and descriptive README.
- Practiced professional Git workflows: logically grouped commits, history clean-up with git filter-repo, and licensing-compliant dataset management.

NumPy Fundamentals Notebooks

- Authored a set of Jupyter notebooks covering NumPy broadcasting, boolean indexing, and matrix operations, applied to exercises such as a Sudoku validator and student data analysis.

TECHNICAL SKILLS

Languages & Libraries: Python, NumPy, Pandas, Scikit-learn, SciPy

Data Visualization: Matplotlib, Seaborn, Plotly, Cufflinks

Tools: VS Code, Jupyter, Git/GitHub

Practice & Problem Solving: SQL and Pandas problem-solving on LeetCode

CERTIFICATIONS & ACHIEVEMENTS

- Kaggle Certificates: Python, Pandas, Data Visualization, Intro to Machine Learning, Intermediate Machine Learning
- Certificate of Participation — QuizOff 2026: India's Biggest AI Quiz, organized by CampusCrew, hosted on Unstop (July 2026)
